## **Introducing world first live virtual reality gaming platform**

Berlin, Germany (Aug 2, 2017) – ArenaFPV proudly announces world first live gaming platform there online players can control real cars, drones and robots to play competitive games. Unlike other video games in ArenaFPV players get live Full HD video stream from the cameras that are mounted on real machines in our Arena. It can be played with phone, tablet, smart TV or PC from anywhere in world.

The ArenaFPV offers VR kit with headset, steering wheel and a gamepad for immersive VR experience and realistic control of machines. Spectators can enjoy breathtaking 360 degree VR experience of ultimate live battles. Another nice feature is that it is prone to cheaters as it has physical game model instead of virtual one.

ArenaFPV will be organizing championship tournaments of competitive remote controlled drones, cars and robotic games with large prize pool.

The Arena will also offer robotic games, the current prototype has more than 20 moving parts and it can be fully controlled remotely. It's height is 175 cm (5'74") and the weight is 70kg (143lbs). The development is still in progress.

ArenaFPV's Indiegogo Campaign has launched August 1, 2017
